Re: **Request for Concurrence**

Proposed New Telecommunications Tower Installation
6457 72 Street, Delta
File No. TOWB053

SLI Towers is proposing a new wireless telecommunications facility at 6457 72 Street, within the City of Delta. The proposed installation is a 60-metre self-support style tower, engineered to accommodate initial and future loading for cellular service providers, and additional fixed wireless equipment as required. Our application has all carriers in mind and has the ability for co-location for all carriers (including Bell, Rogers, Telus and Freedom Mobile). Equipment to support the tower will be in an enclosed compound with no public access. The view of the tower base will be greatly mitigated by a 2.4m high board fence surrounding the compound.

The subject site is zoned Agricultural lands (A1) and was selected due to the great setbacks it provides from nearby residents. This proposal is to address the great need for coverage in Delta, to both its residents and emergency services. This location provides the best setbacks while optimizing the ability to service them with the enhanced coverage and network capacity necessary for these vital services.

As per the ISEDC CPC-2-0-03 – *Radiocommunications and Broadcasting Antenna Systems Protocol*, nearby residents with the prescribed notification radius were mailed a copy of the attached notice of the proposal. Nearby residents were mailed notice of the proposal, as well as the City of Delta (via mail and email), and the ISED Lower Mainland District Office with the public consultation period being held from August 28 – September 29 (32 days). A notice was also placed in the August 28th edition of *The North Delta Reporter*. As of the conclusion of our public consultation period, we have not received any comments from residents. Please see the tear sheet and notice package attached below.

Upon completion of the public consultation requirements, SLI Towers is humbly requesting the City of Delta to concur with its proposed telecommunications installation at 6457 72 Street in Delta in order to help bring connectivity to this part of the community.

Sincerely,

SLI Towers Inc.
